### **UNDER CONSTRUCTION CAROLINAS ACQUIRED BY RALEIGH GENERAL CONTRACTOR**

*Denise Robinson acquires Under Construction Carolinas LLP and plans to expand team*

**Raleigh — July 28, 2022 —** Denise Robinson is now the majority owner of Under Construction Carolinas LLP (UCC), a licensed and insured residential and commercial real estate general contractor and project management services company in Raleigh, North Carolina. UCC is a women- and minority-owned small business with a focus on superior end-to-end project management administration of the construction process to produce unique and beautiful structures.

Under Construction Carolinas specializes in major renovations, flips, refurbishments, and restorations in the Triangle and Rocky Mount area. UCC has a niche offering of repurposing and restoring historic buildings to bring the past to present in a modern way. With Denise's 25 years of small business experience, she is leading UCC to take on historic renovations of homes and downtown buildings in the Triangle. Soon, UCC will announce contracts for refurbishing some of Raleigh's most iconic small commercial buildings.

*"Owning and operating a small business in this post-pandemic era represents an opportunity to demonstrate our strengths to property owners and investors alike," said Denise Robinson, the energetic new owner of Under Construction Carolinas. "In this industry, you must have the ability to team and collaborate administratively. Our (UCC) strength is to manage the complexities of the construction process by problem-solving, collaborating, and negotiating on behalf of our clients. On one day you might find me on a roof-top, and on another, I could be in a crawl space getting a close-up view of a problem brought to my attention by one of our contractors!"*

Under Construction Carolinas has been in operation since 2017 and was acquired in 2018. UCC has plans to quickly expand operations and grow the team. UCC's expansive general contracting and construction offering positions the company to provide a wide variety of services for all types of builds while managing small to large multi-phased projects.
